Dear Colleagues,

It gives us immense pleasure and honour to invite you all at UROCON 2021, an 6th Annual Conference of Nepal Association of Urological Surgeons (NAUS) on 16-17 April 2021 at Kathmandu, Capital City of Nepal.

With the theme of ‘Uro-Oncology: Expanding the Horizon’, this conference aims to address the recent updates & advances, controversies and newer technologies in clinical practices and research.

The conference is targeted to all Urologists, nurses and other allied healthcare providers involved in the field of Urology worldwide.

In view of current COVID pandemic and Nepal Government Regulation, we are planning to have Hybrid conference, a combination of limited physical and virtual meetings on digital platform. Physically, it is expected to be attended by approximately 100 national and 20 international urology delegates and the telecast can be viewed worldwide. Eminent scholars in the discipline of urology will join the various sessions and share their rich scientific experiences.

The conference is also Nepal Medical Council (NMC)-accredited.

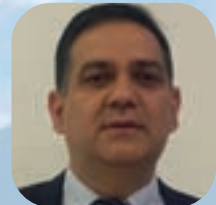

We look forward to welcome you all.

Organizing Chairman
Prof. Dr. Chandra S. Agrawal

Organizing secretary

USG for Urologist

Day 2 17th April, 2021

Association Lectures

Stone Diseases Session

Plenary Session

IJU Session

Transplant session

Election

Validictory and Business Meeting

Best Places to visit in Nepal for Lifetime Experiences

For many reasons, Nepal is a remarkably diverse country that attracts tourists. Some are drawn to the call of the mountains who wants to climb or trek in the Himalayas, others are fascinated by Kathmandu's culture and popular region, and yet others are hoping to find some kind of spiritual awakening. Nepal can be an adventural destiny, a cultural eye opener, an experience that changes lives.

The majority of travelers spend time visiting sacred and historic attractions in Kathmandu, and then head out to other parts of the world. Chitwan National Park for wildlife watching, and the lakeside town of Pokhara, a common area for treks, are some of the best places to visit outside the capital.

Throughout Nepal, trekkers can find a number of choices, with the Everest, Annapurna, and Langtang regions being the most important areas.

A major earthquake hit Nepal in 2072, causing serious damage in Kathmandu and other regions, but reconstruction is under way, and significant progress has been made. While some historical treasures have been lost forever, much of the damage has been restored.

Have a look at our list of the top attractions in Nepal to find the best places to visit.
